

## Young Scientists Club perfect Summer Activities!

My family and I just got back from a week long vacation in Disneyland! But now what? Our summer just barely started and I don't want my girls to get into the...I'm bored phase yet! So the Young Scientists Club is to the rescue!

The Young Scientists Club has tons of different fun kits that both of my girls will love to keep them busy this summer! Leah absolutely loves science, it's one of her favorite subjects in school. So I knew that these kits were perfect for her. We received the Science-Art Fusion Rainbow kit and both of my girls had a ton of fun with it.

My girls are both really into rainbows and I love that it didn't have just one experiment they could do. The kit had several!

"This kit on Rainbows is a member of our [Science-Art Fusion](#) series which combines art and science to inspire creativity while at the same time introducing basic scientific concepts. We have included a unique Science-Art Fusion poster that has the instructions for each project placed in a framed space which can be covered by taping a photo of your final art piece to create a Rainbow Art Gallery. Each kit comes with a customized art/science tray, introduction sheet, large 24 x 24 inch poster, and components to perform 10 exciting experiments and activities such as constructing a butterfly mobile, making rainbow ice, creating a rainbow chromatography snake, designing a rainbow density test tube, crafting rainbow bookmarks, assembling a rainbow flower bouquet, and more. Embark on an exciting Science-Art Fusion Rainbow adventure!

(Ages: 5 and up)

Every themed kit boasts components for creating 10 different experiments. The customized art/science tray keeps all the experiment elements safe in one spot (and not on the kitchen table or floor!) Young Scientists are encouraged to take a photo as each experiment is completed (perhaps wearing a white lab coat?) and then tape the picture on the spot on the poster. When done, a bragging-rights-worthy poster is ready for hanging on a cherished wall." ([Young Scientists Club](#) website)
