

Bonjour Petit Boutique's Unique Products

We are a very creative family and my children love music. My son is only two and wants to sing and play his sister's guitars all the time. Vilac's Red Guitar from [Bonjour Petit Boutique](#) is the perfect size for him. When learning to play the guitar it is very important that your child can reach around the neck of it in order to have proper finger placement for the cords. It's never too early to teach them the correct way even if it is years before they learn to play.

My son's favorite color is red and this one is beautiful it measures 20 1/2-inches tall by 7-inches wide and is painted with a non-toxic finish. Vilac's wooden guitars are designed to suit small hands and is recommended for ages 3+. Toddlers will strengthen their fine motor skill and musical interest by strumming this six-string guitar.

The Storybook Torch from the Moulin Roty's "Le Jardin" collection is the perfect interactive toy to encourage the development of your child's imagination. This "flashlight" comes with three interchangeable discs that clip onto the end. Each disc is projected onto the wall and the images tell a story as you turn the disc. The first features Suzanne and Benjamin going into the garden to sow carrot seeds; the second shows a tree explaining how the seasons change; and the third shows animals happily running about- possibly towards Suzanne with her basket of goodies! This flashlight measures 6-inches long by 2-inches wide and is recommended for tots ages 4+. It is the perfect size for small hands.
