

Must Have Toy – Lunar Rover from GeoSmart

My daughters absolutely love hands on playing. They love to build and create things, so I knew that the Lunar Rover from [Geosmart](#) would be a great hit for my girls.

Magnetism is a force that pulls or pushes. Youngsters are naturally attracted to magnetic construction sets for the simple pleasure of problem solving. The benefits of this delightful play are unlimited: creative thinking, pattern recognition, fine motor skills, eye-hand coordination, decision making and even social abilities. Playing with these great blocks uses all the elements of STEM basics – science, technology, engineering and math principles.

About Smart Toys and Games, Inc.

Smart Toys and Games products develop logical thinking and problem solving skills in all ages through fun, challenging play. Each multi-level game from the SmartGames line is designed to move players through carefully sequenced levels of game play. Fun, durable, and compact, SmartGames are perfect for travel. Their construction sets allow children to explore the world of magnetism in a safe and creative way through making strong building structures and vehicles.

About Lunar Rover

Explore new horizons with the Lunar Rover. This 30-piece magnetic construction set features 5 different geometric shapes and wheels. Amaze yourself and your friends in building, then watching your roger go! The enclosed wheels bring movement to each construction.

My Thoughts:

I absolutely love this set. My daughters love to build things. My middle child I really think might be a builder one day. I am always amazed by the creations that she comes up with. There are times that her creations are completely symmetrical (she's only 4), and amaze me. Since we opened the box of the GeoSmart Lunar Rover, not a single day has gone by that my girls have not created something. My middle child even has to take a picture of each of her creations so that she has something to look at and do again if she wants to. The mom and the teacher in me finds it incredibly important for children to use their imaginations. I hate to see all the kids that have so much screen time today. I know that growing up we didn't have a great deal of screen time—we played with each other and I love having products that help my children continue to work on their imagination. We will definitely be adding to our GeoSmart Collection. (We have other magnetic blocks and these are by far way better than the others that we have tried).

Purchase: If you are interested in purchasing any of these awesome construction sets, head on over to [Amazon](#) and get yours ordered today!
