

# GH

**GOOD  
HOUSEKEEPING**

Our experts vetted 500-plus new toys for safety, quality and skill-building. Then we asked the toughest critics—kids—to name the “bestest” of all. Meet this holiday’s top hits!

**HOW WE TESTED** Our engineers and analysts first made sure toys met safety standards set by the Consumer Product Safety Commission. Then we set up toys to evaluate assembly, construction and durability; checked for pinch points; and drop-tested them to ensure that they wouldn’t shatter into small pieces with sharp edges or pose a choking hazard. Final decisions came from nearly 100 children, ages 1 to 13, who assessed the fun factor in our Media & Tech Lab and at home.

## **5+ AWESOME ASTRONAUT ADVENTURES**

Tap your inner engineer and use magnetic pieces to build a one-of-a-kind exploring vehicle.

**Lab Lowdown** It comes with how-tos for four designs, but kids preferred dreaming up their own creations.

**GeoSmart Mars Explorer, \$70**
