HURDLE THE ROBOT

(Young Scientists Club)

I found that putting together this robot was very cool and exciting. Following the directions, I had to put same color wires together. The wires were white, black, brown and light brown.

We also needed two AA batteries. This toy is recommended for kids 8 and older. I think that putting the robot together should be for a 10-year-old child, not 8.

Hurdle is very cool because

NEWSDAY / PAT MULLOOLY

it stops, backs up and changes directions when sensing an obstacle. When it goes backward, it beeps. It comes with a poster of activities. It was a lot of fun playing with Hurdle.

Ages 10 and older
