

The only 2017 technology and gaming gift guide you need!

O.K., maybe that was a bit of a stretch and we're sure you'll be hitting up numerous gift guides this year, but the items in this guide you know have been personally vouched for by Techaeris writers and editors! We've decided this year that we would only be including products that we have personally reviewed or are in the process of being reviewed and we already know will be worthy tech or gaming gifts. Without further ado, here's the "only" gaming and technology gift guide you'll need from the staff here at Techaeris for the 2017 holiday season!

Sunny The Robot

Educational toys like these are just an amazing investment in the education of our kids. As much as I love other toys like Star Wars lightsabers and Minions fart guns, toys like these are far superior and more valuable than your average mindless toys that are out there. These are totally worth the price and I have no complaints about this kit whatsoever.
